Chapter 5- Mental Disorders (290-319)

Delete the following:

~~In the International Classification of Diseases, 9th Revision (ICD-9), the corresponding Chapter V, "Mental Disorders," includes a glossary which defines the contents of each category. The introduction to Chapter V in ICD-9 indicates that the glossary is intended so that psychiatrists can make the diagnosis based on the descriptions provided rather than from the category titles. Lay coders are instructed to code whatever diagnosis the physician records.~~

~~Chapter 5, "Mental Disorders," in ICD-9-CM uses the standard classification format with inclusion and exclusion terms, omitting the glossary as part of the main text.~~

~~The mental disorders section of ICD-9-CM has been expanded to incorporate additional psychiatric disorders not listed in ICD-9. The glossary from ICD-9 does not contain all these terms. It now appears in Appendix B, which also contains descriptions and definitions for the terms added in ICD-9-CM. Some of these were provided by the American Psychiatric Association's Task Force on Nomenclature and Statistics who are preparing the Diagnostic and Statistical Manual, Third Edition (DSM-III), and others from A Psychiatric Glossary.~~

~~The American Psychiatric Association provided invaluable assistance in modifying Chapter 5 of ICD-9-CM to incorporate detail useful to American clinicians and gave permission to use material from the aforementioned sources.~~
